

Daniel Romero

Systems Engineer & ML / Computer Vision Developer
San Pedro Sula, Honduras | diromerop@gmail.com | +504 3180-2458 | +1 539-525-4337 | github.com/drome05 | drome05.github.io

EDUCATION

Oral Roberts University Tulsa, OK
B.S. Computer Science, Minor in Mathematics — Graduated May 2026
President's Honor Roll (Fall 2022)

EXPERIENCE

Systems Engineer — Develcomp May 2026 – Present
San Pedro Sula, Honduras

- Lead end-to-end network deployments and complex troubleshooting engagements across client sites.
- Oversee network configuration, IPTV/camera system maintenance, and SAP Business One operations simultaneously across multiple clients.
- Serve as a technical resource for junior staff on TCP/IP, firewall policy, VPN architecture, and ERP workflows.

Freelance Web Developer — Independent 2026 – Present
Remote

- Design and build production websites for business clients, end to end: design, development, and deployment.
- Shipped develcomp.com, the marketing site for an IT and telecommunications company.

Engineering Intern (4 summers) — Develcomp Summers 2022 – 2025
San Pedro Sula, Honduras

- Progressed from AV/IPTV systems (2022) to SAP Business One ERP administration (2023) to network infrastructure (2024–2025).
- Contributed to a 350-node network deployment for a large-scale call center: structured cabling, hardware procurement, rack setup, and full ISP/WAN connectivity.
- Enforced firewall rules, VPN tunnels, and access-control policies to meet security compliance requirements.
- Earned Ruijie Specialist Engineer certification (June 2024) in enterprise network configuration and management.

Vice-President & President — Student Org. for Athletic Relations (SOAR), ORU Aug 2024 – May 2026
Tulsa, OK

- Led event logistics and volunteer coordination for campus-wide athletic events.
- Developed promotion strategies that expanded student participation.

SELECTED PROJECTS

Estella: AI Fashion Assistant — *Python, PyTorch, OpenCV, ResNet-50, Computer Vision*
Ensemble AI system that classifies wardrobe items and generates outfit recommendations using computer vision, color theory, and a temporal optimization engine. 88% classification accuracy, 95% color match reliability.

ext2 Filesystem + Shell — *C++, x86-64 ASM, TCP/IP, POSIX*
TCP/IP client-server implementation of a Unix-style ext2 file system in C++, with inode management, directory traversal, and a cooperative thread scheduler using inline x86-64 context switching.

AI Face Recognition — *Python, TensorFlow, OpenCV*
CNN for real-time face detection and recognition in live video streams, with hyperparameter tuning and dataset augmentation for higher accuracy.

AI Text-to-Speech from Paper — *Python, OpenCV, TensorFlow, TTS*
OCR pipeline that extracts text from scanned documents and converts it to natural-sounding speech, making printed materials accessible to everyone.

develcomp.com — *HTML/CSS, JavaScript, ES Modules*
Marketing site for an IT and telecommunications company, designed and built from scratch and shipped to production.

TECHNICAL SKILLS

AI / ML: PyTorch, TensorFlow, OpenCV, CNNs, Deep Learning, NLP, Recommendation Systems
Languages: Python, C++, Java, R, JavaScript, SQL, PHP
Systems: TCP/IP, POSIX, x86-64 Assembly, ext2 File Systems, DNS/DHCP, Firewalls, VPNs
Web / Mobile: React Native, Node.js, Django, Firebase, AWS S3, REST APIs

CERTIFICATIONS & LANGUAGES

Ruijie Specialist Engineer — Ruijie Networks, June 2024
Languages: English (Professional), Spanish (Native)
